TIME FOR AN UNDERWATER ADVENTURE

Travel underwater on the award winning HydroBOB.
It's easier than riding a bike – you don't even need to know how to swim!

The HyrdoBOB enables you to cruise effortlessly underwater without cumbersome dive equipment. Simply submerge, put your head into the air bubble and swing your leg over the seat. The standard scuba tank delivers continuous fresh air into the bubble for over one hour. The constant flow regulator system of the BOB ensures that fresh air is continuously fed into the bubble, allowing you to breathe as you normally would.

As with scuba diving, the HydroBOB's depth is controlled by inflating or deflating the HyrdoBOB's internal air bladder. The BOB is propelled forward by a 12-volt thruster unit that delivers a maximum speed of 2 knots. Perfect for cruising around the reefs to find Nemo without disturbing the tranquility of the deep.

A buoy at the surface is attached to the BOB and your buoyancy set by your Dive Instructor. Together, this ensures that your BOB remains at a fixed depth. Always dive using the surface float to set the maximum dive depth and protect the reef.

MOLOKINI

The Molokini is an all-transparent two-passenger kayak made of the same durable polycarbonate material used in the production of bulletproof glass and fighter jet canopies. Visibility on a sunny day and during non-turbulent water conditions can yield views to depths of more than 10 meters, for the exploration of new worlds waiting to be discovered.
